

SEA ESTATES

Batangas Value Guide - Planning Report

SEA ESTATES · hello@esrealty.ph · esrealty.ph

01 Valuation Summary

Central planning estimate	PHP 2,875,000
Planning scenario range	PHP 2,443,750 - PHP 3,737,500 (85%-130%; not statistical confidence)
Separate BIR zonal reference	PHP 1,150,000
Calculation / data version	2026.10.1 / bir-2022-rdo58-59

Property

Type	Vacant lot
Classification	Land
Lot / land area	100 sqm

Location

Pinned coordinates	
Address	BINAY ST (RESSURRECCION ST)
Town	Bauan
Barangay	Poblacion III
Province	Batangas
Region	Region IV-A (CALABARZON)

Neighborhood and location scores were not assessed by this property guide.

02 Detailed Computation and Legal Basis

Official BIR zonal value	PHP 1,150,000
Central planning estimate	PHP 2,875,000
Upper planning scenario	PHP 3,737,500
Comparable listing context	No comparable asking listings were available; the estimate uses the disclosed BIR-based factors.
BIR rate per sqm	PHP 11,500 on 100 sqm
Land component	PHP 2,875,000
Data coverage	good
Effective land rate build-up	PHP 11,500/sqm BIR base (no corner adj.) x 1 use x 2.5 band x 1 region = PHP 28,750/sqm

Basis and provenance

Basis of value	Market-oriented planning guide
----------------	--------------------------------

A decision-support guide positioned for a selling or buying decision. It is not a statutory assessment, tax determination, or lending valuation.

02 Detailed Computation and Legal Basis - continued

Schedule currency check

Checked 2026-09-30; next review 2026-10-30

Order of adjustments: BIR zonal rate per sqm for matched street and classification -> Corner lot adjustment -> Property-use proxy factor -> Market band midpoint -> Regional adjustment -> Lot area -> Improvement component (house and lot only)

The range is an asymmetric planning scenario envelope, not a statistical confidence interval or an accuracy score. Source match depth is reported separately and does not set its width.

This guide does not cover: No physical inspection of the property is performed or implied. Interior condition, structural defects and unpermitted additions are not observed; recorded condition inputs are unverified. Comparable listings are asking-price context, not verified transaction records. The factor set is a SEA ESTATES internal reference and has not been reviewed by an independent qualified appraiser. Flood, access and site notes are non-monetary client-supplied flags. Occupancy, title and inheritance answers may apply disclosed model marketability deductions; no document verification is implied.

03 Transaction Costs and Inheritance

Entered/assumed price	PHP 2,875,000
Illustrative tax base	PHP 2,875,000 / SEA ESTATES market guide estimate (illustrative)
Capital gains tax 6%	PHP 172,500
Documentary stamp tax ~1.5%	PHP 43,125
Transfer illustration ~0.5%	PHP 14,375
Registration estimate ~0.1%	PHP 2,875
All transaction costs	PHP 232,875
After all transaction costs	PHP 2,642,125 (before broker/notary; all four costs deducted)
Seller commission scenario 3%	PHP 86,250
Seller-paid costs / proceeds	PHP 258,750 / PHP 2,616,250 (CGT and broker seller-paid)

Qualifying capital-asset sale assumed. Assessor FMV, exemptions and notarial fees are not supplied. Transfer rate depends on the LGU; cities may use up to 0.75%. Confirm actual fees and payer allocation. For the illustrated qualifying capital-asset sale, CGT uses the higher of selling price and statutory fair market value; statutory FMV considers the BIR zonal reference and assessor schedule values. Without an entered price, the planning estimate is an assumed selling price, not statutory FMV. Missing assessor values, asset classification and exemptions must be confirmed. There is no 50%-of-zonal proxy or excess-only CGT in this model.

Property-only estate scenario PHP 2,875,000 less citizen/resident standard deduction PHP 5,000,000; scenario tax PHP 0

These property-only scenarios assume the property were the entire citizen/resident estate. Actual liability requires all estate assets, applicable death-date values, liabilities and deductions. The PHP 10M family-home limit is conditional, not an additional universal exemption. Registrable property may require an estate return even when estimated tax is zero.

04 Market Evidence

Source match street

Comparable evidence No comparable asking listings available. Disclosed factors were used.

05 Documents and Filing Guide

Seller: Original Owner's Duplicate Certificate of Title (OCT/TCT)

Seller: Tax Declaration, current year

Seller: Real property tax clearance

Seller: Updated receipts of real property tax payments

Seller: Valid government IDs of the seller

Seller: Special Power of Attorney, if a representative signs

Seller: Marital Consent or Spousal Affidavit, if married

Seller: Authority to sell, if the owner is abroad or unavailable

Seller: Electrical and water account clearance, where requested

SEA ESTATES

05 Documents and Filing Guide - continued

Buyer: Valid government IDs

Buyer: TIN, for BIR purposes

Buyer: Proof of income or source of funds

Buyer: Marriage Certificate, if married

Buyer: Down payment receipt or proof of funds

Buyer: Pre-approval letter, if bank financed

Buyer: Post-dated cheques, if bank financed

Buyer: Power of Attorney, if represented

1. Execute the deed of absolute sale / Notary Public / Before any filing

2. Pay capital gains tax / BIR RDO / Within 30 days of notarisation

3. Pay documentary stamp tax / BIR RDO / Generally within 10 days after the close of the document month; confirm applicable rules

4. Obtain Certificate Authorizing Registration / BIR RDO / After CGT and DST are settled

5. Pay local transfer tax / City or Municipal Treasurer / Within 60 days of the deed

6. Register the transfer of title / Registry of Deeds / After CAR release

7. Update the tax declaration / City or Municipal Assessor / After the new title is released

06 Pricing Scenarios and Limitations

Lower planning scenario (85%)	PHP 2,443,750
---	---------------

Central planning estimate	PHP 2,875,000
----------------------------------	---------------

Upper planning scenario (130%)	PHP 3,737,500
--	---------------

Scenario endpoints are reference points, not mandatory walk-away or listing prices. No certified-appraisal or PVS-compliance claim is made. Valuation inputs are client-supplied and not verified by a site or document inspection.

Reference data as of 2022-07-23. SEA ESTATES Property Value Guide a planning estimate using the imported BIR zonal reference, disclosed SEA ESTATES factors, and disclosed improvement-cost assumptions where applicable. Comparable asking-listing prices are reported as context and are not direct calculation inputs. Review the selected schedule, match level, factors, and assumptions; confirm current BIR/LGU references and property details before a transaction. A site and document review can further refine the estimate.

Generated by SEA ESTATES. Review the source schedule, match level, and stated calculation factors. Property condition, title, local evidence, and buyer demand can affect transaction value. For a formal valuation assignment, request a licensed real estate appraiser's site and document review.
